nederm.org

Dear Member/Attendee,

The **New England Dermatological Society** invites you to attend our upcoming clinical meeting jointly provided by the Massachusetts Medical Society and the New England Dermatological Society. This meeting is hosted by the **Massachusetts General Hospital, Department of Dermatology**, and will be held in Boston, Massachusetts, on **Saturday, February 8, 2020**.

This is a great opportunity to view up to 25 unique and interesting clinical cases. We expect that approximately 200–250 dermatologists and dermatologists-in-training will attend. Come see some patients, participate in case discussions, and mingle with colleagues.

In addition, please save the dates for the other upcoming New England Dermatological Society meetings. We look forward to seeing you soon!

Sincerely,

Jennifer Huang, MD
Secretary, New England Dermatological Society

Accreditation Statement

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through joint providership of the Massachusetts Medical Society and the New England Dermatological Society. The Massachusetts Medical Society is accredited by the ACCME to provide continuing medical education for physicians.

AMA Credit Designation Statement

The Massachusetts Medical Society designates this live activity for a maximum of 4.75 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

As a result of participating in this activity, learners will be able to:

- Identify signs, symptoms, and pathophysiology of dermatological disease and conditions, rare and unusual dermatological diseases.
- Formulate a diagnosis, describe evidence based on best practices for treatment of dermatological diseases conditions.
- Illustrate normal evolution in pediatric nevi and tumors that might be otherwise concerning in adults.
- Describe considerations for imaging and work-up in congenital melanocytic nevi and birthmarks.
- Understand the role of diagnostic imaging and sentinel lymph node biopsy in the work up of MCC; recognize the use of the Merkel cell polyomavirus serum antibody test in clinical practice; discuss recently approved therapeutic strategies in MCC, including the use of ICI as primary treatment, as well as emerging strategies in the neo-adjuvant and adjuvant setting.
- Describe the top 10 contact allergens in adults and pediatric patients and how to avoid them; Understand some common allergens that can cause systemic allergic contact dermatitis.
